

2835 Package SMD LED 150mA

VR A7C8G

Description

The constructive of this series of LED are different from the PCB type SMD LED. The lead-frame is of metal, reflector is made of thermoplastic and construct into this unique type of SMD LED. The wavelengths and Luminous Intensities of this series are grouped under 150mA for uniformity suitable for backlighting applications or in-car dashboard or telecommunications.

Applications

- Industrial control systems signal indicator
- Automotive features
- Flat backlight for LCD switch and symbol
- Light pipe application
- Status used
