

5mm Round 12 Volt Resistor LED

VT 57U76

Description

This high brightness Red emitting LEDs are developed for the automotive and other industries or consumer product application which used 12 DC Volts sources. VT 57U76 contain an integrated resistor for current limiting in series with LED chip. This allows the LED lamp to be driven from a 12 Volts source without an external current limiter. These LED lamp are intended for space critical application such as panels, switches and other which are driven from 12 Volts source.

Application

- Status light cars application
- Status lights
- ON/OFF indicator in Switches
- Background illumination for switches

Electronic Optical Characteristics (at 5 Volts):

Part Number	Emitted Color	λ (nm)		Lens Color	Iv(mcd)		View Angle (2 θ 1/2)	Vs(V)	
		λ_d	λ_p		Min.	Typ.		Min.	Max.
VT 57U76	Red 	624	632	Milky	100	200	40	11	13

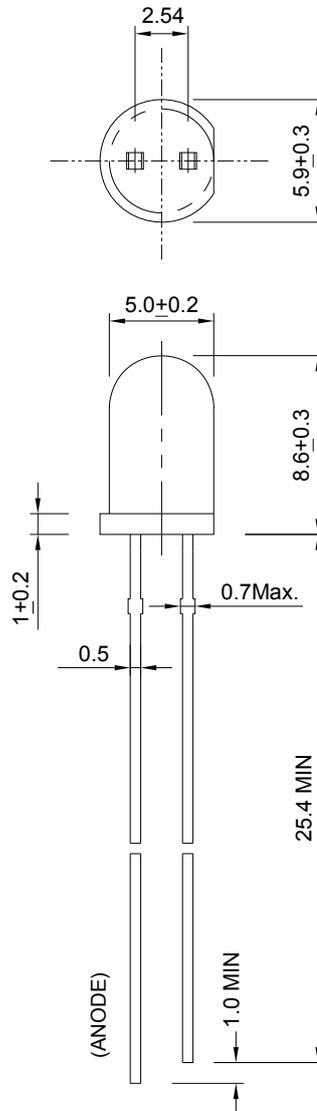

Absolute Maximum Ratings at Ta=25°C

Emitted Color	P _D (mW)	T _{sol} (°C)	Reverse Voltage(V)	T _{opr} (°C)	T _{stg} (°C)
Red	100	260±5 for 5 sec	13	-40~+85	-40~+100

Note: Please take note the Absolute Maximum Rating values. Any operation beyond the specified ratings in this table will result degradation of LED life-span and may cause LED to fail.

Package Dimension:

unit: mm

Notes:

1. All dimensions are millimeters.
2. Dimensional tolerance is +/- 0.2mm unless otherwise specified.
3. Epoxy meniscus under flange is 1.5 mm max.
4. Specifications are subject to change without notice.
