

0603 Package SMD LED 0.2mm Height

VS 2688M

Description

The major breakthrough in VS 2688M Yellow color emitted is package in dimension L x W x H, 1.6 * 0.8 * 0.2 mm. The dice used in this series is AlGaInP material. The advantages of AlGaInP technology are low power consumption and obtaining high luminous intensity under low current driving condition. The wavelengths and Luminous Intensities of this series are grouped under 5mA for uniformity. These LED are suitable for multiple usages in series connection applications.

Application

- Cellular phone display
- Backlight keypads
- Industrial control systems signal indicator
- Automotive features
