VT R3D6.26

Description

The constructive of this series of LED are different from the dip type LED. This VT R3D6 is rectangular light source with green diffuse lens designed for a large bright source application. Such construction is very suitable to be used in high demanding reliability applications. The dice used in this series is InGaN material. The advantages of InGaN are low power consumption and obtaining high luminous intensity under low current driving condition.

Applications

- Lighting indicator
- Status lights
- ON/OFF indicator
- Backlight illumination
- Front panel indicator
