

Side View SMD LED 1.0mm Height

VS 78D8

Description

The major breakthrough in VS 78D8 is Yellow-orange color emitted package in 3.0 * 2.0 * 1.0mm dimension side look SMD LED. The dice used in this series is AlGaInP rather than the conventional GaP and GaAsP/GaP. The advantages of AlGaInP are low power consumption and obtaining high luminous intensity under low current driving condition. The wavelengths and luminous Intensities of this series are grouped under 20mA for uniformity.

Applications

- Backlighting applications
- Automotive features
- Status indication
- Industrial control systems signal indicator
