

Side Emitted SMD LED 0.6mm Height

VS 78F8

Description

The major breakthrough in VS 78F8 is Yellow-orange color emitted package in 1.7 * 1.1 * 0.6mm dimension side look SMD LED. The dice used in this series is AlGaInP rather than the conventional GaP and GaAsP/GaP. The advantages of AlGaInP are low power consumption and obtaining high luminous intensity under low current driving condition. The wavelengths and luminous Intensities of this series are grouped under 20mA for uniformity. These LED are suitable for multiple usages in series connection applications.

Applications

- Backlighting applications
- Automotive features
- Status indication
- General lighting indictor
