

Side View SMD LED 0.3mm Height

VS 79E8M

Description

The major breakthrough in VS 79E8M is Orange color emitted package in 1.8 * 1.0 * 0.3mm dimension side look SMD LED. The dice used in this series is AlGaInP rather than the conventional GaP and GaAsP/GaP. The advantages of AlGaInP are low power consumption and obtaining high luminous intensity under low current driving condition. The wavelengths and luminous Intensities of this series are grouped under 5 mA for uniformity. These LED are suitable for multiple usages in series connection applications.

Applications

- Backlighting applications
- Automotive features
- Status indication
- General lighting indictor
