

2.4x3.2mm Dome Type SMD LED

VS 9828

Description

The major breakthrough in VS 9828 is Yellow-orange color emitted, package in dimension L x W x H, 3.2 * 2.4 * 2.6 mm. The dice used in this series is AlGaInP material rather than the conventional GaP and GaAsP/GaP. The advantages of AlGaInP are low power consumption and obtaining high luminous intensity under low current driving condition. The luminous Intensities of this series are grouped under 20mA for uniformity. These LED are suitable for multiple usages in series connection applications.

Applications

- Industrial control systems signal indicator
- Automotive features
- Front panel indicator
- Status indication
