

'Yoke Bend' Lead Subminiature SMD LED

VL B328

Description

This series of leaded SMD LED is also known as Subminiature LED. There are 'Gull Wing', 'Yoke Bend' and 'Z Bend' type of lead forming but straight lead is available as well. The dice used in this series (Blue / True Green) is InGaN material. The advantages of InGaN are low power consumption and obtaining high luminous intensity under low current driving condition.

Applications

- Industrial control systems signal indicator
- Automotive features
- Front panel indicator
- Status indication
